2) Has the code of ethics or conduct been disseminated to all directors, senior management and employees?

Yes, the Corporation's Code of Conduct and Ethics has been properly disseminated to all directors, senior management and employees.

3) Discuss how the company implements and monitors compliance with the code of ethics or conduct.

ALI has established a compliance structure which assigns oversight responsibility for the Company's Code of Ethical Behavior program to the Human Resources Group (HRG) Head or his/her designate. SBU and Group Heads are responsible for establishing, implementing and maintaining an effective program, including a system of internal controls, to ensure compliance by everyone with all laws and regulations and the provisions of this Code. People who manage others have a special responsibility to show, through words and actions, personal commitment to the highest standards of integrity. As

coaches and leaders, supervisors and managers must:

- Maintain an environment of open communication in which the ALI values and the provisions of this Code and related policies and instructions are shared, discussed and even debated.
- Ensure that their people understand the ALI values and the provisions of this Code and provide additional training, when appropriate.
- Take reasonable steps to ensure that unethical conduct within their areas of responsibility is detected and addressed.
- Consider whether a person lives the ALI values before placing him or her in a position of responsibility. Everyone is responsible for notifying the Human Resources Group, Legal, Audit or the Compliance Officer immediately if he/she suspects, observes or learns of any unethical business conduct or the commission of any dishonest, destructive, or illegal act.

The appropriate Group will investigate all reports and provide feedback when appropriate. There will be no reprisals against those who report suspected violations in good faith, and their identity will be protected to the extent consistent with law and ALI policy.

Because ALI strongly believes in ethical behavior, employees who do not comply with the provisions of this Code and other Company policies and procedures may be subject to a range of disciplinary actions, up to and including dismissal. 4. State, if any, questions and answers during the Annual/Special Stockholders' Meeting.

The following are the relevant and significant comments and inquiries of the stockholders during the Annual Stockholders' Meeting held last April 19, 2017.

- Mr. Alfred Reiterer of the Philippine Active Shareholders Association Inc. commended the success of the Corporation and asked about the distribution of the Corporation's assets in the country and how this might change after 2020. The President commented that the distribution follows where there are economic activities. Specifically, he noted that the Corporation's assets are still concentrated in the National Capital Region (NCR) and Region IV-A, where most of the Corporation's estates are located, with rapid expansion in other areas particularly in the Visayas and Mindanao. Regarding the portfolio mix by 2020, the President stated that a similar mix is to be expected where 60% to 70% of the assets will be concentrated in the NCR and Region IV-A.

Mr. Reiterer also commented that the country's relationship with China seems to have improved after Rodrigo Duterte's victory as the country's President. He cited that some Chinese developers are proposing or have even started developments in the new Manila Bay area. He asked how the Corporation sees the potential of Chinese investment in the country especially in the real estate sector. The President replied that any foreign investment in the country would be a positive development as it is expected to support economic growth. He also mentioned that Management has met with a few Chinese companies interested in doing developments in the Philippines. He emphasized though that the Corporation's primary mode is to partner with local companies mentioning that Management has actually met, and is negotiating, with the management of a company that is looking at doing a fairly large-scale mixed-use development. He also added that a challenge for foreign investors is how to assemble the necessary amount of land especially if they are targeting large-scale developments in Metro Manila and surrounding areas. He noted that it has become increasingly difficult to assemble large parcels of land in such areas

Mr. Reiterer further asked if the Corporation is planning to explore or considering to venture into low-cost hotels. The President answered that development of low-cost hotels is currently not part of Corporation's plan. He said that the Corporation is focused on expanding the SEDA brand as well as its existing resort hotels.

- Mr. Philip Turner, another stockholder, commented that it is nice for the Corporation to have ways of reshaping

the country to be more beautiful and be an impressive place to live in but, he noted that there seems to be a weakness in improving pedestrian and transit connectivity. He specifically cited access to and from Circuit Makati. He asked about the actions and plans of the Corporation in improving the access to this specific project. The Chairman noted that the issue on transit is being looked at from many points of view. In Ayala Corporation (AC), one of its subsidiaries partnered with Metro Pacific Investments Corp. for the Light Rail Transit 1 project which aims to improve the capacity as well as the stations in the said railway line. On the other hand, the Corporation's One Ayala project will focus on improving the conditions of the commuting public, coming in and out of Makati, by creating a better environment through integrated systems of rail, buses and other modes of transportation. He noted that for Circuit Makati, there is actually a great deal of work towards creating a one-way loop system and in expanding the roads leading to it. The President further mentioned that there is a constant evaluation of the traffic flow and signalization in all of the Corporation's developments to see if there are any improvements that can be made to address traffic issues. One of these ways is improving the pedestrian experience within the Corporation's developments. The Corporation is also working closely with the local government units, for areas outside the developments, to help in the improvements that are being planned. In the case of Circuit Makati, the President cited that the Corporation is working closely with the Makati City Government to widen the roads in South Avenue and to create a one-way loop system for easy ingress and egress through the project. In addition, he noted that AC together with SM is proposing to do an express way to connect areas in San Juan City, Mandaluyong City and Entertainment City which will pass through Circuit Makati.

Mr. Turner also inquired if the developments in Circuit Makati are being sold all at once or individually. The President noted that the projects are done in phases and not all inventories are for sale as some units are being held for lease.

- Mr. Alfredo Parungao of the Shareholders Association of the Philippines, asked about the major business risks that the Corporation faced in 2016 and those that are foreseen in the future. He particularly raised concerns relating to the earthquakes that happened just recently. In reply, the Chairman stated that although the growth trajectory is very strong for the Corporation, Management is greatly diversifying the product range and moving them to different parts of the country to make sure that the Corporation is not exposed to any particular area or one particular type of price point. He also noted that financial risks were handled very well in the past and, at present, are continuously being reviewed even at the Board level. He also mentioned that Management makes sure that large projects are 70% to 80% sold before starting another project.

In relation to the concerns on the earthquakes that recently happened, the President emphasized that the Corporation's project specifically the buildings are planned and constructed to withstand major earthquakes. Detailed geotechnical studies are done to make sure that the land is appropriate for the planned development. The Corporation also uses reputable local and even international structure plans while all projects undergo structural reviews, and follow national building structure standards, and in many cases, even international building codes. There are also quality checks to ensure that designs are faithfully followed. The President also noted that in an untoward event, the Corporation's organization is prepared. In each of the facilities, there is also an emergency brigade team that acts as a crucial partner to any incident, and which undergoes weekly drills. At the corporate-level, there is a quick reactive team equipped with tools and equipment for disaster, and may be dispatched to areas where help is needed. In addition, the operation centers, which are located in Makati, Nuvali and Cebu, were upgraded to be able to dispatch necessary resources, if needed while there are redundant life support systems in all buildings and communication systems in all geographical areas.

Mr. Parungao also asked why is there no item in the agenda of the stockholders' meeting pertaining to the approval by the stockholders of the acts of the Board of Directors and Management in the preceding year, and why the list of these acts are also not included in the Definitive Information Sheet. The Corporate Secretary explained that the said item in the agenda is not for compliance with any legal requirement as the law only requires stockholders' approval for specific items. He also mentioned that this item was actually included in the past as a way of broadening the participation of the stockholders and of providing them more information. It was not included in this year's meeting agenda as the Securities and Exchange Commission's examiner requires the Corporation to submit a complete list of the resolutions, and requires access to the minutes of meetings of the Board of Directors, Board Committees, and Management Committees to verify if the submitted acts and resolutions are complete.

- Mr. Roberto Chua Go, another stockholder, inquired why the names of the architects and architectural firms that the Corporation work with are not included in the Annual Report provided to the stockholders. He also asked if all the buildings constructed by the Corporation are Leadership in Energy and Environment Design (LEED)-certified. The President, in reply, noted that not all buildings are LEED-certified but, some office

buildings are. He emphasized though that more than getting certifications, Management believes that it is more important to construct and develop the projects based on the Corporation's sustainable measures to make sure that they are not carbon intensive, and are energy efficient.

On another note, Mr. Go suggested to remove the signage of Hotel Intercontinental in Glorietta since the hotel has been demolished. He also requested to have a copy of the audio-visual presentation. Lastly, he asked Mr. Jaime C. Laya, one of the independent directors, if he loaned some of his art pieces and paintings to Metropolitan Museum and some of the Ayala Group's buildings. Mr. Laya replied that he has some paintings that he owned personally, and is also a Board member of various museums, and a Trustee of Ayala Foundation, Inc.

- Mr. Sam Canoa, another stockholder, asked about the status of the project for the unified common station between SM North EDSA and Trinoma and the contractors for the project. The Chairman replied that the parties already agreed on the location of the common station which, they believe, is the best solution for all the parties concerned and which would enable the commuting public to go to different destinations in the area and at the same time interconnect with the various railway lines in the most efficient way. The President, on the other hand, noted that there is no contractor yet for the portion that will be built by the Corporation as they are still at the planning stage. He also mentioned that once the government gave its go signal, the project will be passed on to Makati Development Corporation which handles almost all of the construction works of the Corporation's projects. In relation to this, Mr. Canoa also inquired if it will really take another two years to complete the project and expressed his doubts and fears that it may be delayed further as some of the lawmakers are opposing it. In response, the Chairman mentioned that some issues were already settled but, he admitted that the issue on the implementation is really tricky. He emphasized though that the completion of the common station is in everyone's interest.
- Mr. Canoa also aired his concern on the fire incident that happened in Trinoma and asked if the Corporation is really prepared for such incidents noting that the Corporation's stocks got affected after the incident. The President clarified that the fire happened in Landmark which is a land lessee, and as such, the Corporation does not operate its building. However, the President confirmed that Management is already working closely with Landmark to make sure that their site is safe and that all the necessary safeguards are in place to make that such incident does not to happen again.

Mr. Canoa also mentioned the Duterte Administration's Infrastructure Plans specifically the subway train which will pass through some of the Corporation's projects in Bonifacio Global City as well as the Arca South. He inquired if the infrastructure plans can really be done in five to six years, and what are the Corporation's strategies in relation to this. The Chairman explained that there are various groups within Ayala Group that are studying these infrastructure projects one of which is AC Infrastructure Holdings Corporation which focuses on rail and airport projects, among others. He also mentioned that the Corporation is focused on building terminals. He also commented that the five to six years target timeline is really a challenge but, the Corporation welcomes the ambitious targets of the government especially that these are long overdue, and that the infrastructure has to really keep up given the growth in the country. The Chairman emphasized that the Corporation is supportive of this particular plan of the government. In addition, the President mentioned that the Corporation is also supportive of the subway project being proposed especially that it makes the commuting public's access to the Corporation's developments easier.

Lastly, Mr. Canoa asked for updates on the South Integrated Transport System, The President stated that planning is being done and the Corporation can start the construction once the Skyway map is released.

- Mr. Jay Fondoso, another stockholder, expressed that he is a proud owner of a unit in One Legazpi Park and noted that most of the Corporation's projects, unlike those from the other developers, are equipped with machines that test an earthquake's magnitude and indicate whether the building is still livable in the midst of earthquakes. He also commented that, for him, the Corporation's projects are the best where the owners are treated fairly, and where he can sleep soundly at night. He also shared that their family is happy that Amaia Land Corp. took over the development of his family's property in Shaw Boulevard noting that the first developer who acquired it did not finish the project. The Chairman thanked him for sharing his story and noted that stakeholders and the Corporation should work together to achieve similar stories.
- Ms. Clarisse Dela Costa asked if the Corporation has any plans of venturing into gaming industry given that the Entertainment City in Parañaque is already flourishing with some developments. The Chairman noted that it was a group decision, in conformity with the Board's advice, not to get involved in the gaming industry directly. He further stated though that the Corporation is participating in some of the development in the

reclamation area, and the Corporation might be present in some gaming facilities but not in gaming itself as there are many others things that the Corporation is busy with already.

- Mr. Go reiterated his request to have the names of the Architects and the Architectural Firms that the Corporation work with be included in the Annual Report. The Chairman and the President noted that Management will look at it but, the President also expressed that Management is being cognizant of the competitors observing how the Corporation do things, and that items to be disclosed should be considered greatly.
- Mr. Hernan Revadillo, a stockholder, requested for Management to take a look at and make necessary adjustments in the egress and ingress of the construction site of The Gentry project in Salcedo, Makati which according to him is positioned right in front of another building in Valero Street, where traffic is already terrible. He mentioned that other construction projects in the area built their respective ingress and egress on the side streets and not right on the main road. He also commented that there should be consistency on the Corporation's statement that details of the construction plans are being reviewed as well as on its commitment to lessen carbon emission citing that the construction equipment are smacked right in front of another building which received all the smog, smoke and carbon emissions of the construction equipment. The President apologized and noted that this will be looked at and Management will make the necessary adjustments. The Chairman also mentioned that one representative of the Corporation will approach Mr. Revadillo to discuss and address this issue further.
